# EVALUATE

1. Prior to the departure of Dr. Antonio Parra Velasco for the IX International Conference of American States, he reportedly reviewed and approved petitions offered for the Conference by the Ecuadoran Federation of University Students (FEUE) at their Fourth Congress in Loja in November 1947. The strongest suggestion made by this Communist-controlled group was that the Rio Protocol should be revised in recognition of the injustice to Ecuador by its provisions.
2. In addition to the petition presented to Dr. Parra Velasco as President of the Ecuadoran delegation to the Conference, FEUE leaders are presently preparing letters to university organizations in other Latin American countries, requesting their support in bringing pressure to bear on the delegates at the Conference with regard to this matter.
3. FEUE students reportedly also are responsible for articles which have recently appeared in El Nacional, a Quito daily, in favor of the policies of Parra Velasco and against United States congressmen for their stand on the Gran Colombia Merchant Marine. These articles have been consistent with the usual Communist Party line adopted against the United States and the Pan-American Union.
